

## Pixelrun: Continuum

(iBulla, 2025)

*In Continuum, each sinuous pathway is a testament to our capacity for deliberate and unforeseen transformation. Much like a single water drop expanding into ripples, tiny anomalies arise within the work, revealing how one small shift can alter the entire system. These subtle deviations mirror the profound, often invisible ways in which our digital and analog footprints can reconfigure the future, forging new possibilities and reframing our understanding of what lies ahead.*

*Now exhibited and available at Neumarkt 8, the show invites you to observe these ripples of change and to ponder the delicate balance between order and disruption— a reminder that within each anomaly, we discover the seeds of evolution.*
